EXPERIENCE

Front End Developer

GeekStudio

09/2022 - 11/2022

As a Frontend Developer my main task was

not just complete the task, but perform it so that it does not affect the speed and performance of the site. Of course, I completed each task on time, which is very important for me.

The main stack of technologies used in this company: HTML, CSS, JavaScript, React, Redux | redux-thunk | redux-toolkit,

MaterialUi, React-query, Firebase, TypeScript,

git, webpack

EDUCATION

Frontend Developer course

Geeks

2020

Mentor of Front-end courses.

Mentoring began after three months of training. As a mentor, my job is to help beginners learn new technologies as well as learning JavaScript concepts. This is how I developed not only my hard skills but also my soft skills.

CERTIFICATES

Geeks Certificate

12/2020 - 06/2021

SUMMARY

Front End Developer with 1 year of experience in building and supporting web applications. I offer you my candidacy because I have very strong knowledge in JavaScript and React. I quickly master new technologies, which is very important for a developer. Since many new and very useful technologies appear every day.

I always pay attention to details, which is equally important for a good result.

Interaction with the team is very important for me, because in this way you will be much more effective in performing your tasks.

Best regards,
Osmonov Sultanbek
